

SYSTEM DEVELOPMENT LIFECYCLE

Lecture 2

The System Development Life Cycle

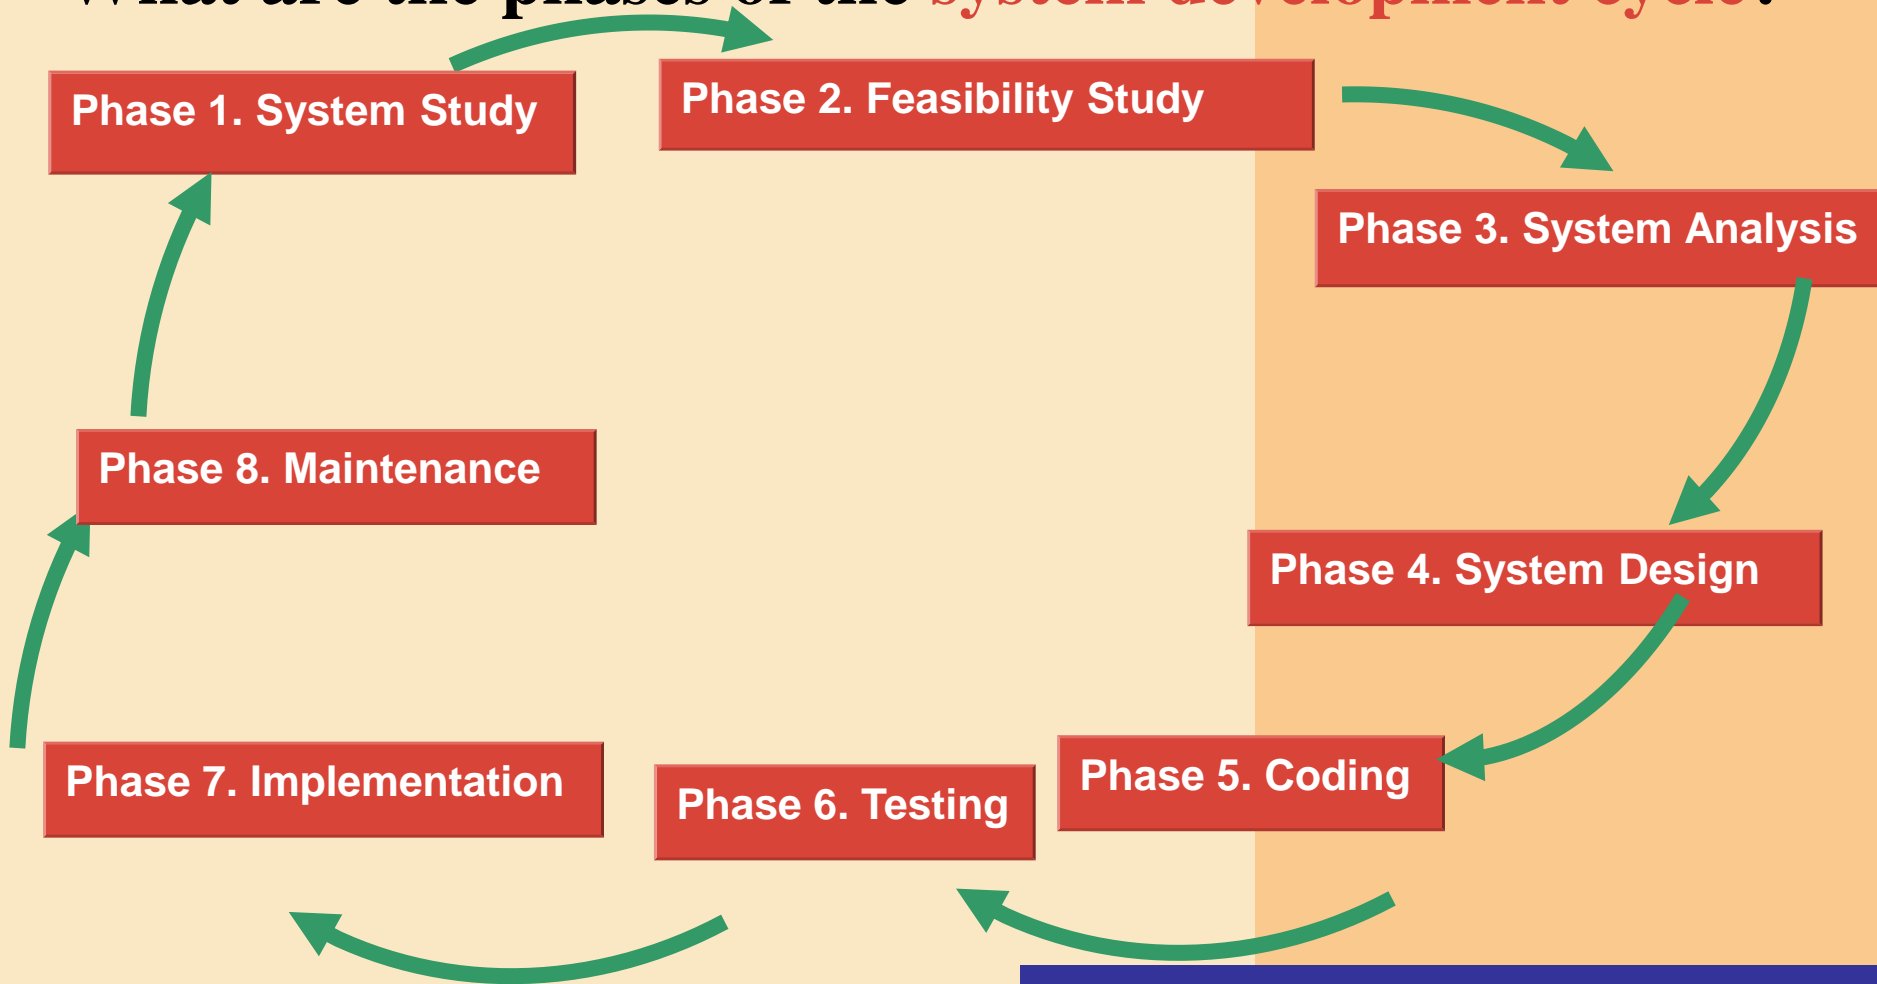

What is an **SDLC**?

an organized process of
developing and maintaining
systems.

Combination of various
activities

The System Development Life Cycle

What are the phases of the **system development cycle**?

The System Development Life Cycle

What are guidelines for system development?

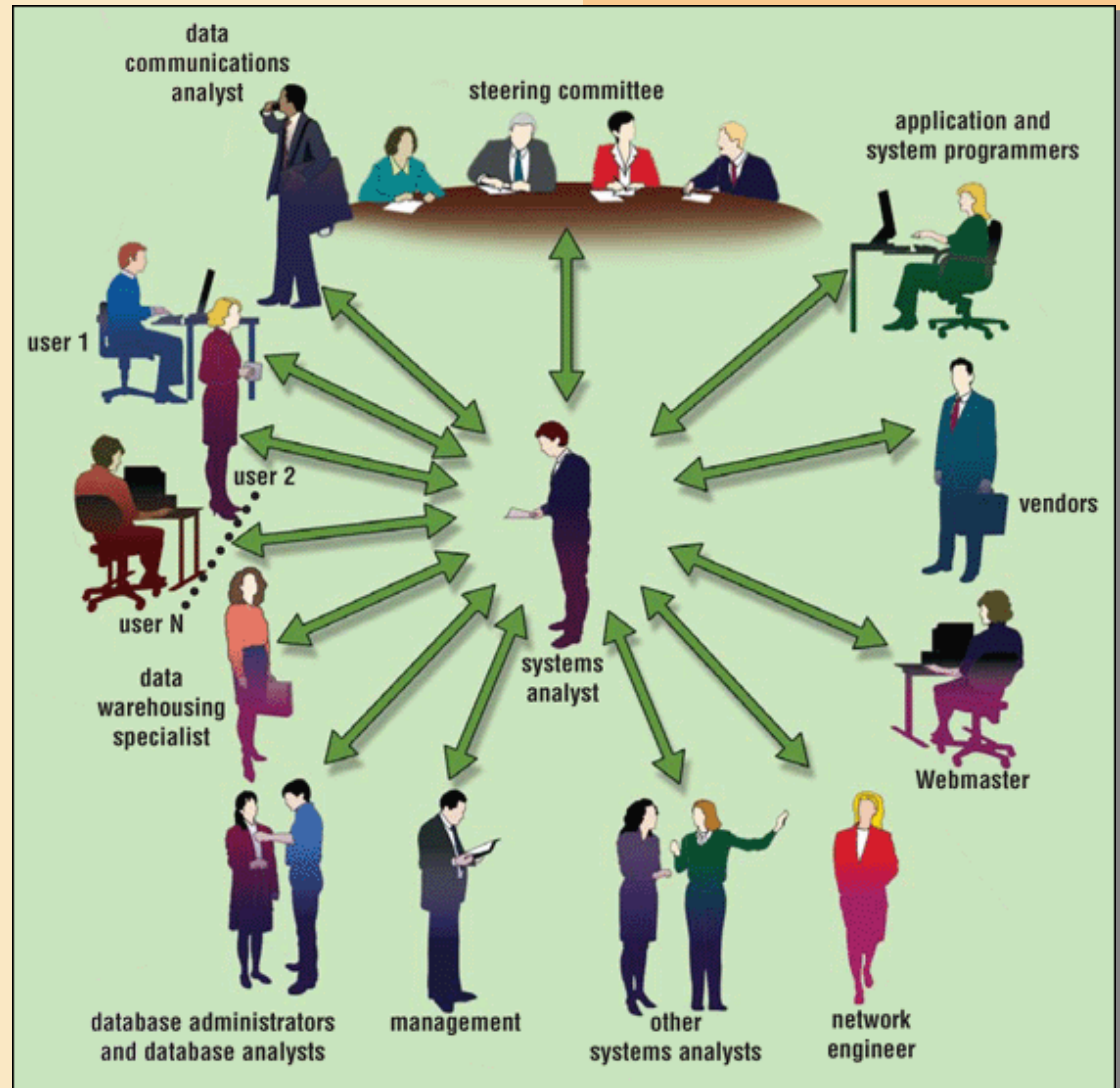

Arrange tasks into **phases
(groups of activities)**

Involve **users (anyone for whom
system is being built)**

Develop clearly defined **standards (procedures
company expects employees to follow)**

The System Development Life Cycle

Who participates in the system development life cycle?

The System Development Life Cycle

What is the **project team**?

Formed to work on project from beginning to end

Consists of users, systems analyst, and other IT professionals

Project leader—one member of the team who manages and controls project budget and schedule

The System Development Life Cycle

What is a **System Study**?

Clear Picture of what
actually the physical
system is

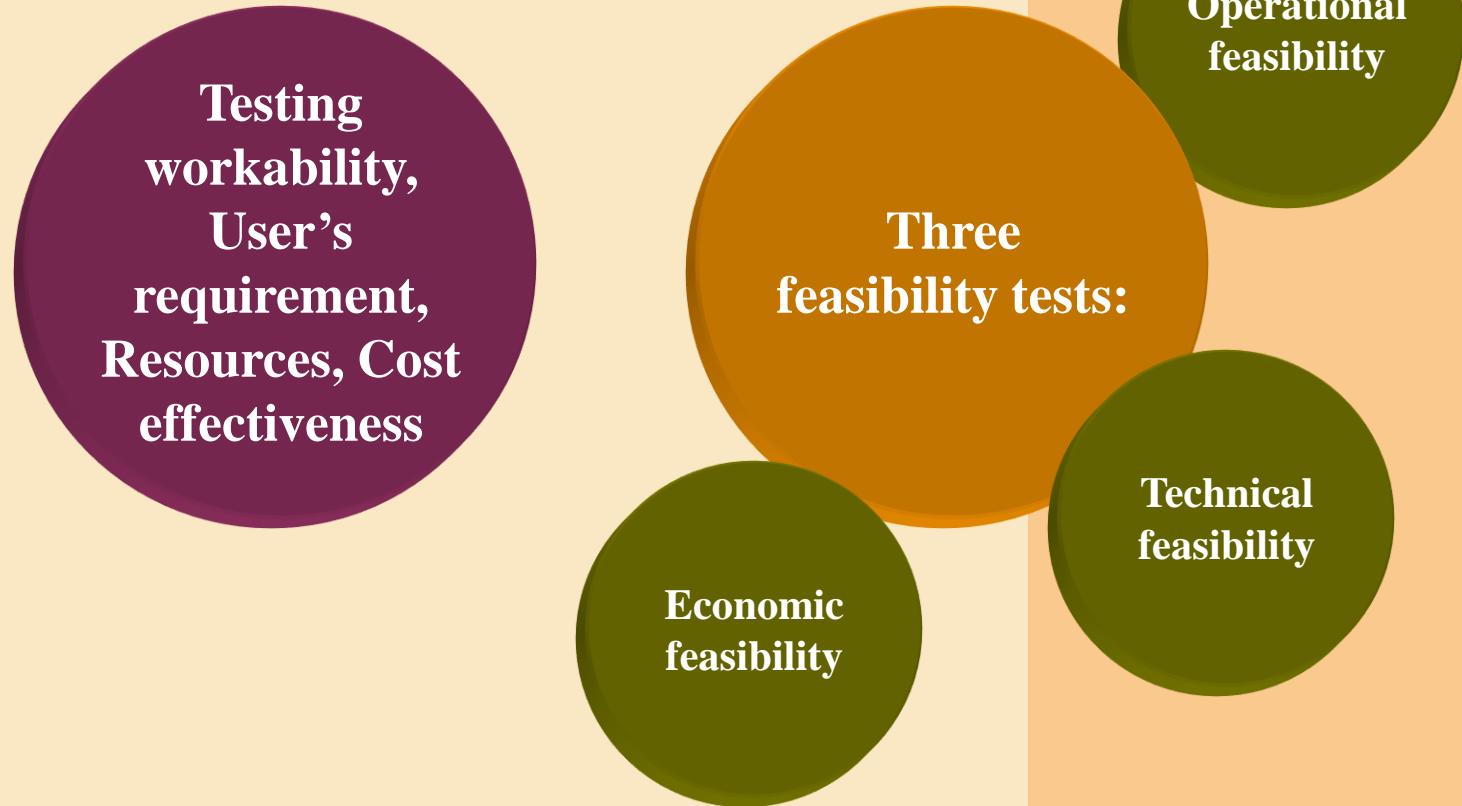

Two Phases

Scope
Identification

Requirement
Identification

The System Development Life Cycle

What is **Feasibility**?

The System Development Life Cycle

What is **System Analysis**

The System Development Life Cycle

What is the **Design Phase**?

Detailed analysis of a new system.

Major step in moving from
problem to solution

Two stages

General
Design

Detailed
Design

The System Development Life Cycle

What are tools and technique for designing

1. Flow Chart

2. Data Flow Diagram

3. Data Dictionary

4. Structured English

5. Decision Tables

Apply for a car insurance

Explore alternatives

Conditions are inputs

Verifications to perform

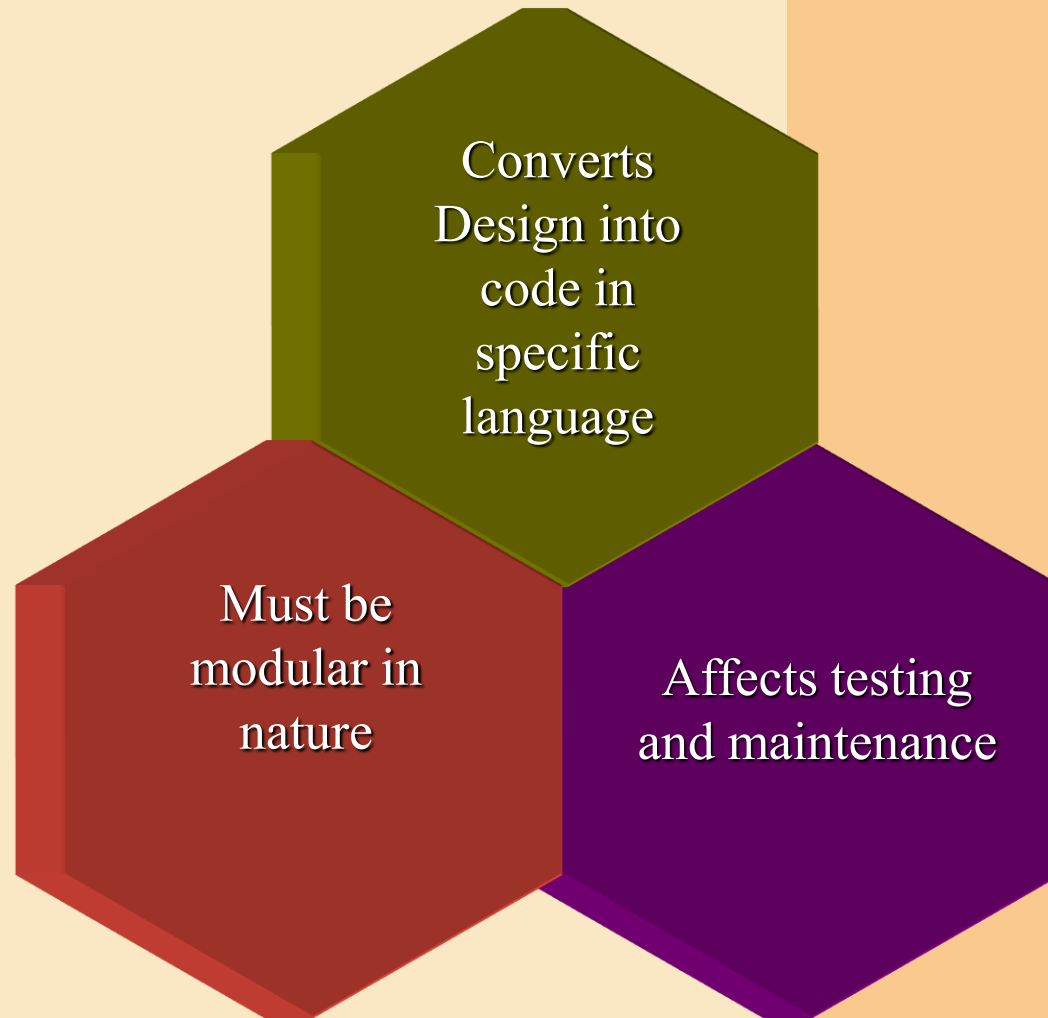

Test actions are outputs

Tests to run

Input : decision point questions	1	2	3	4	5	6	7	8
Q1 : Number of accidents > N	Y	Y	Y	N	N	N	N	...
Q2 : Type of car = { }	Y	Y	N	N	Y	Y	N	...
Q3 : Age of the car > M	Y	N	N	N	Y	N	Y	...
Output : test actions	↓	↓	↓	↓	↓	↓	↓	↓
- Check message "Refuse to insure" - Return to the main menu	×	×	×					
- Accept to insure - Select standard rate - Check price - Display information				×				
- Accept to insure - Select special rate - Check price - Display information						×	×	×

The System Development Life Cycle

**What is the
Code?**

The System Development Life Cycle

What is **Testing**?

Analyze software for finding bugs.

Test plan is developed and run on given set of test data.

The System Development Life Cycle

What are different test run?

Unit Test

Verifies each individual program works by itself

Systems test

Verifies all programs in application work together

User Acceptance Testing

determines if the system satisfies the basic requirements

Integration Test

Verifies application works with other applications

The System Development Life Cycle

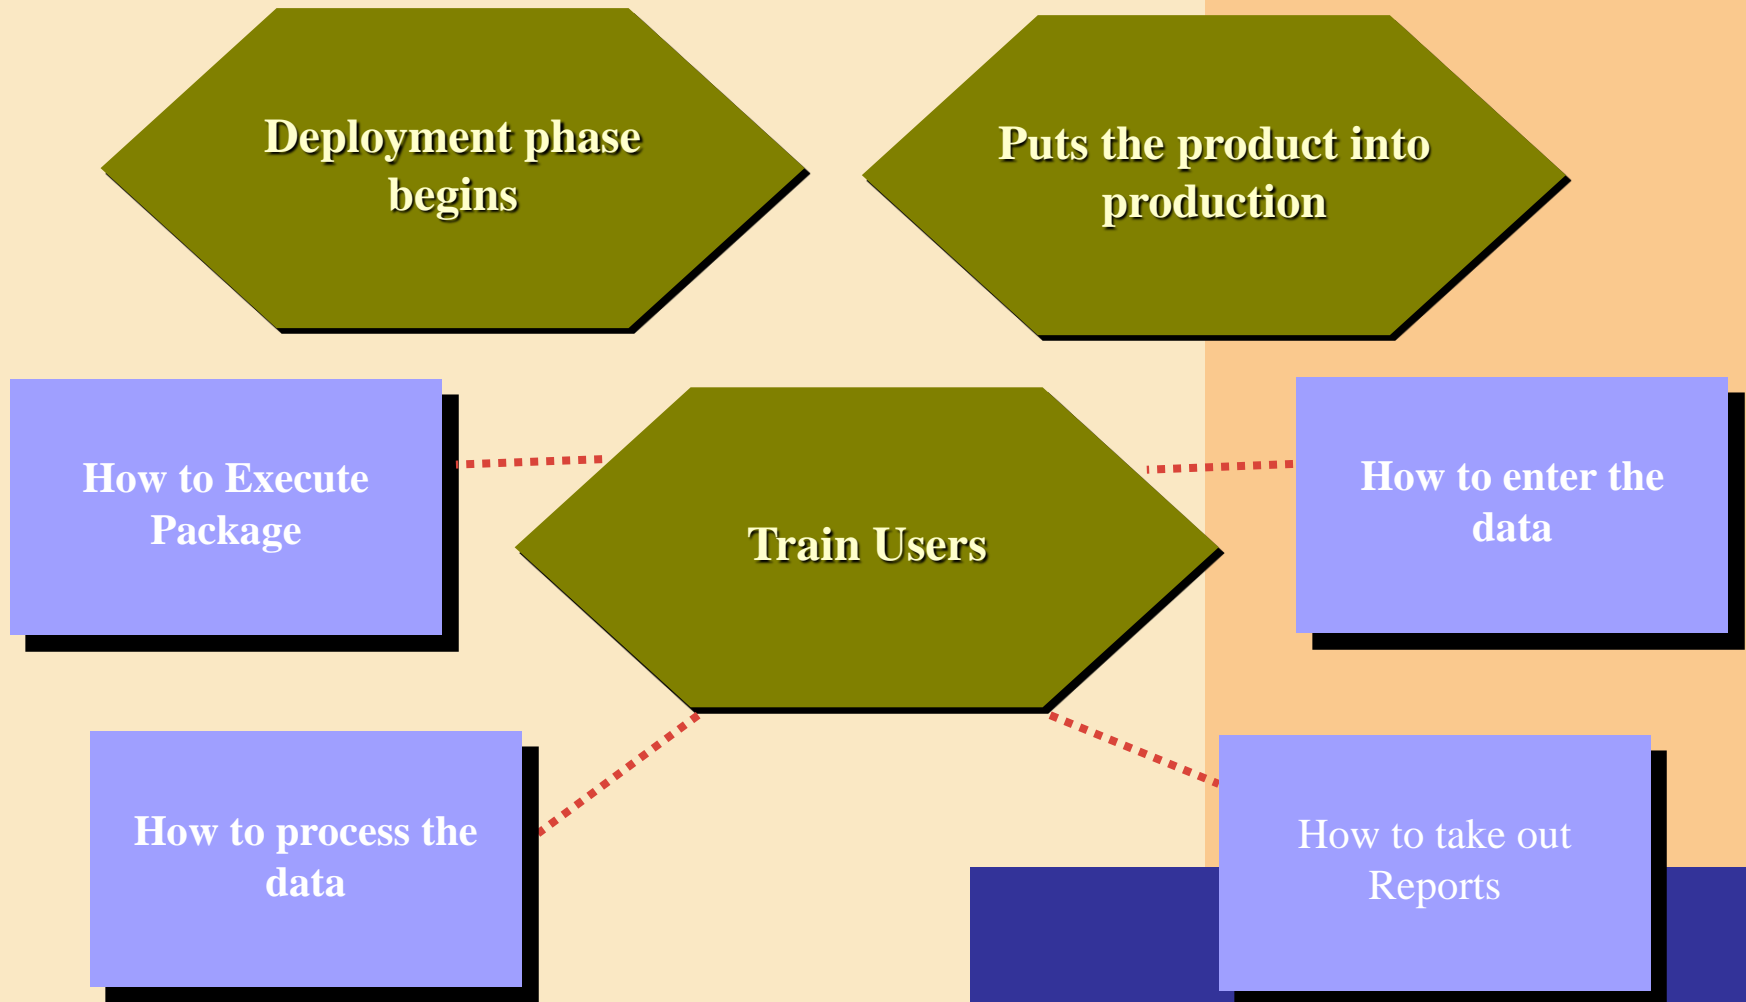

What is the **implementation**?

- Purpose is to construct, or build, new or modified system and then deliver it to users

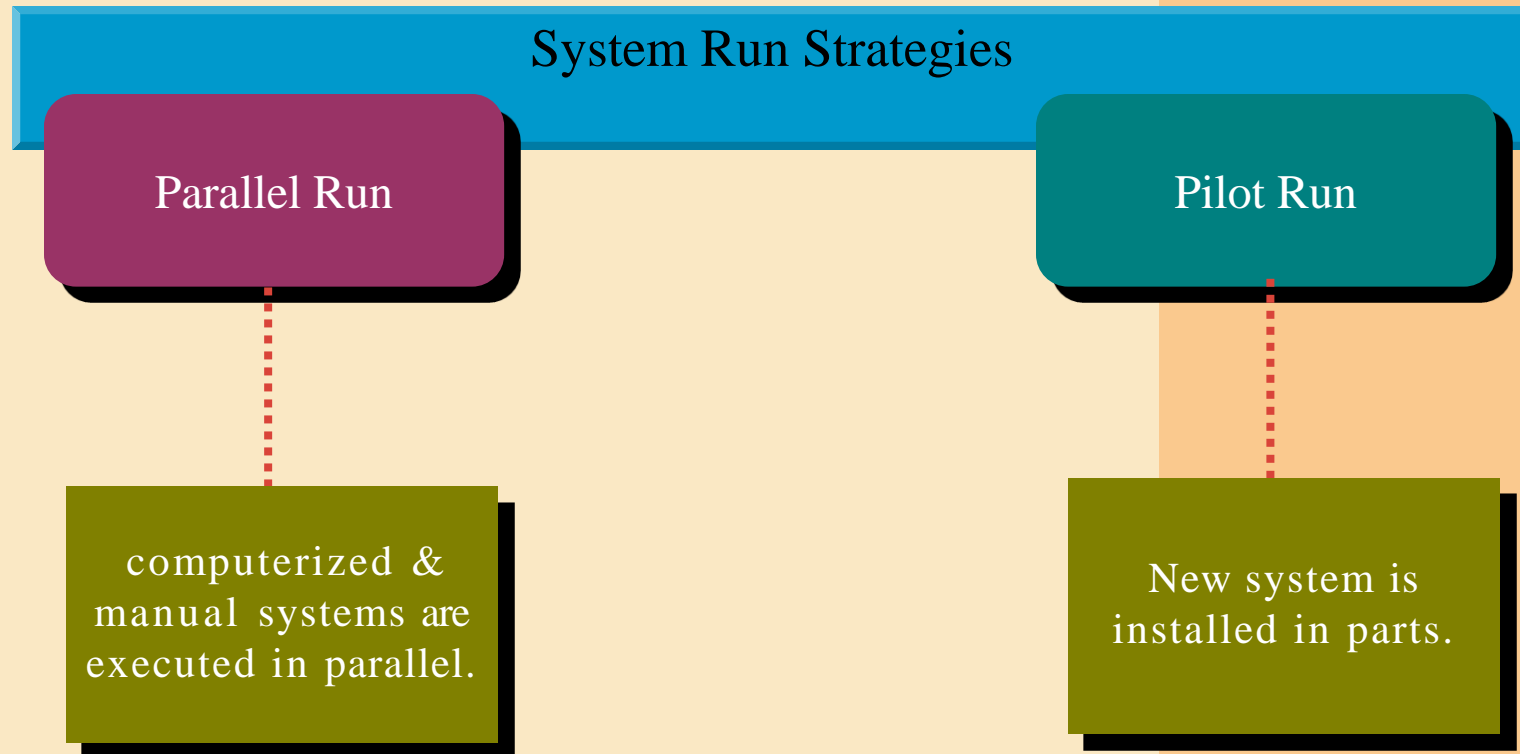

The System Development Life Cycle

What is **Implementation**?

The System Development Life Cycle

What are implementation strategies?

The System Development Life Cycle

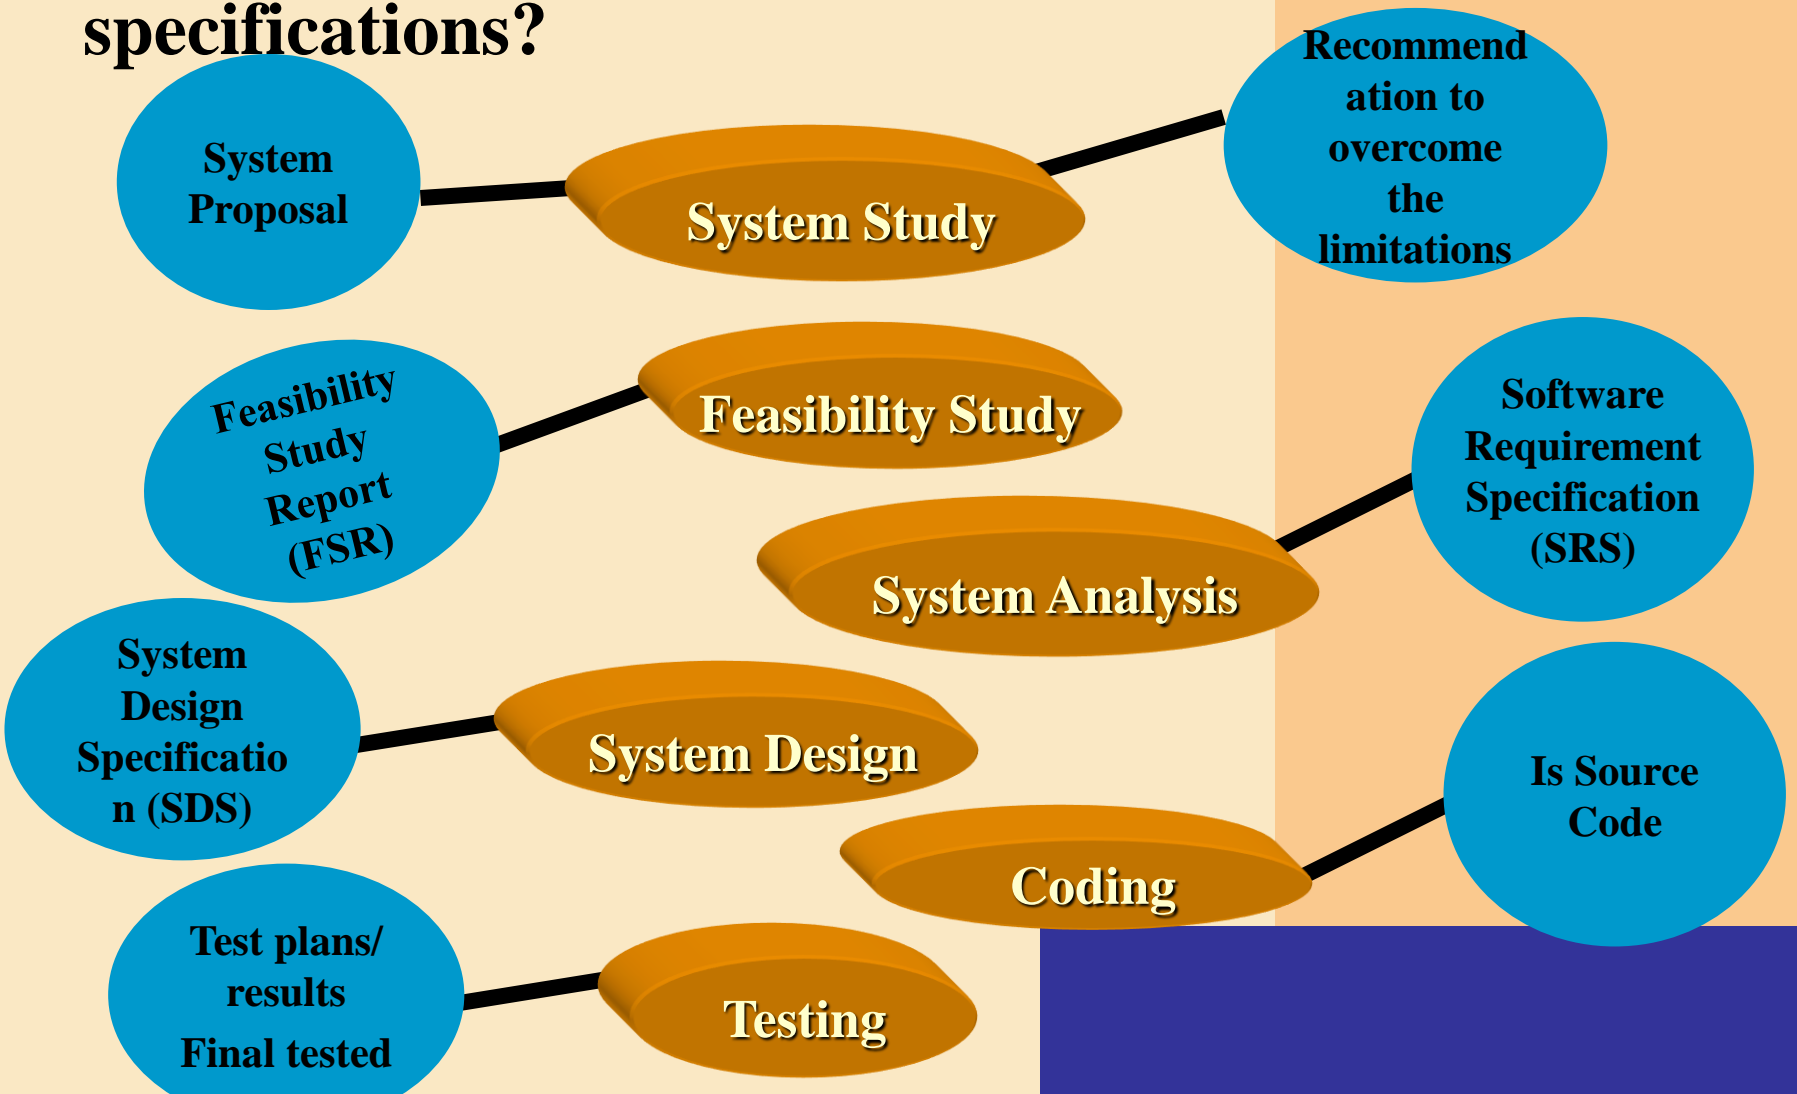

What is a **Maintenance** ?

**Eliminate errors in the
system during its
working life**

**Tune the system to any validation
in its working environment**

The System Development Life Cycle

What are the documents used to summarize technical specifications?

Home Work

The System Development Life Cycle

What are **System Environments**?

- ☐ Development
- ☐ Test
- ☐ Staging
- ☐ Pre-Production
- ☐ Production
- ☐ Mirror
